

JUNIPER SETTERBERG

Juniper Setterberg is an undergraduate student at Barnard College. Her background centers on the questions raised by the biological sciences and the philosophy of science.

EXPERIENCE

ALAN LOVE - PHILOSOPHY UNDERSTUDY

University of Minnesota - 2025

Studied under Dr. Alan Love to propose further strategies for improving current species concepts and models of evolutionary development and cellular biological research

FREEMAN LAB - RESEARCHER

University of Minnesota 2024-2025

Collaborated on protein engineering project with automethylating “borosin” RiPP proteins under the supervision of the Freeman lab.

WAGNER LAB - RESEARCHER

University of Minnesota 2023-2024

Collaborated on cancer immunotherapy project with chemically self-assembling nanorings constructed from nanobodies under the supervision of the Wagner lab.

HONORS

International Science and Engineering Fair 2025 Finalist

One of among five high students in the state of Minnesota to achieve this award at the Minnesota Science Fair, earning the opportunity to present at the 2025 International Science and Engineering Fair

3M Young Inventor Recognition Award

Awarded as one among fifteen other students at the 2025 Minnesota State Science Fair for research into protein engineering and drug applications.

Inspiring Excellence Award

Awarded by the Inspiring Excellence organization for research into the SamA1 peptide

SKILLS

Bacteria, Fungal, Organoid Culturing
Chromatography (Denaturation, SEC, IMAC)
Gel Electrophoresis
Gene Knockout Assays
Xcalibur
X-ray Crystallography
